ROTADAIRON®

WHY CHOOSE ROTADAIRON ?

Like us, you appreciate the job well done. Our tools benefit from more than 65 years' experience and the constant desire to build a « perfect machine ». Whether it is our weeders, our soil preparers, our seeding machines, our overseeders, dethatcher-spiker or our mulchers, they have all been designed with the same objective: that you can have a quality tool for a long time. Carry out your projects day after day with a professional look. Be proud of your

DESIGNER AND MANUFACTURER SINCE 1958

We have always made the choice to master in-house the design and manufacture of our products. All our employees are involved in the process of designing and finalizing new products. It is indeed the integration of the proposals of our welders, machinists, assemblers to the designs of our integrated design office that will allow us to provide you with the innovative and unique product you are looking for.

This product is of course at the beginning, the result of the feedback of the field experience acquired around the world with you, our customers. We guarantee quality customer service, high availability of spare parts thanks to a large stock and our internal manufacturing.

We know that it is this virtuous cycle that will allow us to keep customer goodwill.

OUR COMMITMENTS

CUSTOMER SATISFACTION

Your satisfaction is our priority, from equipment selection to day-to-day and long-term use

ROBUST MACHINES

We have always made the choice to manufacture durable goods :

STABNET PRIMO 55 ROTADAIRON®

Cup-type cutting table patented

Finishing raking and harrowing

SELF-PROPELLED MECHANICAL WEEDERS

The StabNet PRIMO 55 is a simple, economical stand-alone mechanical weedkiller. The machine can be used for both curative and maintenance weeding. It works in BOTH forward and reverse gears and has a tilt function, making it highly productive.

It is fitted with rotating rollers to protect street furniture.

It can also be used for levelling, decompacting and reprofiling driveways.

The machine is available in a thermal or electric version (PRIMO 55 E).

MECHANICAL WEEDERS

The StabNet 55/70/90P are multi-purpose mechanical weeders that can be fitted to a wide range of carriers.

These machines can be used for maintenance or curative weed control at high output. They work BOTH forwards and backwards, and feature a tilt function, making them highly productive.

The machines can also be used for levelling, decompacting and reprofiling driveways. Optional stripping and finishing kits can be fitted to the rear of the carriers.

Les machines peuvent aussi être utilisées pour des opérations de nivelage, décapage, décompactage et de reprofilage des allées.

Des kits de défeutrages et de finitions (options) se fixent to l'arrière des portes outils.

Option : 100L transport skip

TRAILED/TRACTOR MOUNTED MECHANICAL WEEDERS

The StabNet 100L is a simple, economical trailed/tractor mounted mechanical weeder for lawn tractors, quad bikes, micro tractors, etc.

The machine can be used for effective curative or maintenance weeding.

It can also be used for levelling, decompacting and reprofiling driveways. Its optional skip can be used to transport materials.

STONE BURIERS FOR TILLERS

This soil preparer and stone burier is thought for cultivators. This machine has been designed to perform tilling to 140 mm, burying pebbles/litter/grass, levelling with adjustable levelling blade, rolling with metal mesh roller. The use is made in direct or on a ground previously decompacted in depth and cleared of large stones.

STONE BURIERS FOR SKID-STEERS

These soil and stone buriers are designed for Skid-Steer (mini-loader). There are three versions of the machine hitch:

- Toro / Ditch Witch / Vermeer type hitch plate : STH 36 / STH 42

- Bobcat type hitch plate : STH 36 B / STH 42 B

- Adaptable to your carrier by your own : supplied without hitch plate, without hoses, without couplers : STH 36 / 42 ADAPT

It allows the building or renovation of green spaces by preparing the seed bed before seeding. The machine is multi-purpose, it allows tilling, burying (stones, rubbish, herbs, etc.), levelling, mixing and rolling the surface. The use is done live or on a ground previously decompacted in depth and cleared of large stones.

STONE BURIERS FOR TRACTORS

These soils preparer and stone buriers are designed for tractors. It allows the building or renovation of green spaces by preparing the seed bed before seeding. The machine is multi-purpose, it allows tilling, burying (stones, rubbish, herbs, etc.), levelling, mixing and rolling the surface. The use is done live or on a ground previously decompacted in depth.

MANUAL SEEDING MACHINE

The Rotadairon® SEEDCAR is a manual seeding machine designed for seeding all types of grass (bluegrass, red fescue or ray-grass). This gravity seeder is equipped with a graduated sector flow adjustment. For working comfort, the opening/ closing of the seeding is done from the handlebars. It also makes it possible to gear up and roll up all the «corners» of narrow or difficult access grounds.

The metal mesh roller, at the front, wafts the soil. Then the seed drill deposits the seeds. Finally the smooth rear roller, ideally compacts the soil to obtain a good germination and avoid the marking of the steps of the user.

Technical details :

Machine	SEEDCAR
Seeding width	700 mm (27" 1/2)
Total width	840 mm (33")
Front roller type	Metal mesh
Front roller diameter	Ø 220 mm (8" 1/2)
Rear roller type	Stainless steel smooth
Rear roller diameter	Ø 200 mm (7" 3/4)
Weight	51 Kg (112.4 lb)

ELECTRIC ASSISTED SEEDER

The Rotadairon® e.SEEDCAR 750w is an electric assisted seeder which will allow you to comfortably turf your land and preserve the environment.

The machine is fitted with a quiet electric motor and its battery has an autonomy of 60-90 min, allowing for about 2500 m² per cycle.

- For sowing on prepared soil: The mesh roller at the front embosses the soil. The seed drill then deposits the seeds. Finally, the rear roller smooths and compacts the soil to ensure good germination and prevent the user's footsteps from leaving marks.

- For overseeding: By tilting the handlebar of the e seedcar +, you can overseed after the necessary preliminary steps (short mowing, intense dethatching/scarification).

After sowing, a supply of amendment should be applied, followed by a pass with a smooth roller to ensure good germination.

SELF-PROPELLED SEEDING MACHINE

The Rotadairon® SD 700 is a self-propelled seeding machine designed for precision seeding, seed burial and field filling.

The Rotadairon® SD 700 can be used to sow the majority of grass varieties such as bluegrass, red fescue, ray grass, etc...

Reliable, handy and efficient, it allows you to sow quickly and effortlessly.

The metal mesh roller, at the front, wafts the soil. Then the seed drill deposits the seeds. Then the rotor claws the soil. Finally the smooth roller at the back compacts the soil ideally to obtain a good germination and avoid the marking of the steps of the user.

The Rotadairon® SD 700 is driven by the rear packer roller.

SELF-PROPELLED SEEDING MACHINE

The Rotadairon® SD 700 Smart Seeder is a self-propelled seeding machine designed for precision seeding, seed burial and field filling.

The SD 700 SMART SEEDER is an evolution of the SD 700. It features the proven design and components of ROTADAIRON turf seeders, with a reduced weight for even greater manoeuvrability.

The Rotadairon® SD 700 Smart Seeder can be used to sow the majority of grass varieties such as bluegrass, red fescue, ray grass, etc...

Reliable, handy and efficient, it allows you to sow quickly and effortlessly.

The metal mesh roller, at the front, wafts the soil. Then the seed drill deposits the seeds. Then the roller claws the soil. Finally the smooth roller at the back compacts the soil ideally to obtain a good germination and avoid the marking of the steps of the user.

The Rotadairon® SD 700 is driven by the rear packer roller.

The machine is available in a petrol or electric version (SD 700 E).

DETHATCHERS FOR TRACTOR

The DS Dethatchers Spikers are the evolution of our proven “ED” models well known for their superior dethatching qualities with their unique blade fixing system, accepting 3 variants of knives to precisely meet your needs.

These dethatching machines allow to perform dethatching or scarifying operations at the desired depth (from 0 to 60 mm). In addition to these operations, the machines allow to carry out an aeration of the ground (spiking effect, without power take-off) or a rolling. The machines are equipped with a quick-change blade system (Rotadairon® patent). The blades are positioned magnetically on their support. All the supports are locked by a single nut at the end of the rotor axis.

DETHATCHER - COLLECTOR FOR TRACTOR

This dethatching / collecting machine allows to carry out the dethatching operations of a green in one pass. The machine has a patented sweeping system with hydraulic drive. The hydraulically discharged collection container, with a capacity of 180 liters, allows for the clearing of a whole green. In addition to these operations, the machine can also be used to aerate the ground (spiking effect, without power take-off) or to roll. The machine is equipped with a quick-change blade system (Rotadairon® patent). The blades are positioned magnetically on their support. All the supports are locked by a single nut at the end of the rotor axis.

3 knife configurations :

- **a** Sharpened (standard): Stainless steel knife sharpened for classic de-thatching
- **b** Not sharpened: Made of stainless steel knives not sharpened for more aggressive de-thatching
- **c** Carbide plate: Carbon steel with carbide plate for very aggressive de-thatching

CLEARMAX 145 ROTADAIRON®

Sharp discs for stress action on weeds

Dethatching teeth

MULTIFUNCTION TURF REGENERATION TOOL

The Clearmax is a multifunctional tool designed for all stages of turf regeneration without chemical inputs. Its modular design allows each function to be adapted according to the season and turf requirements.

Its disc system provides precise soil cultivation: weed stress, linear aeration and light decompaction to promote healthy turf. It weakens weeds that are not treated by the superficial work of the harrows. The adjustable tine dethatching device removes dead organic matter and straightens the grass blades. During the overseeding phase, the tines improve seed penetration and sowing uniformity.

The spline-slit seeder, with flow proportional to forward speed and adjustable from the cab, ensures uniform seed distribution thanks to an efficient pneumatic system.

Finally, the rear roller firms the seedbed.

Thanks to its versatile design, the CLEARMAX ensures a lasting improvement in lawn density and quality.

Machines	Clearmax
Working width	1450 mm (57" 1/16)
Total width	2250 mm (88" 9/16)
Weight	520 kg (1147 lb)
Tractor : Required power	18 - 25 CV (18 -25 HP)
Working depth (max)	0 to 60 mm (0" to 2" 1/4)
Interval between sowing	47.5 mm (1" 7/8)
Rotor outer diameter	225 mm (8" 7/8)
Number of discs	32
Depth adjustment	Screw jacks
3 point hitch	Categories 1 & 2
Tractor forward speed	7 Km/h to 13 km/h (4.3 to 8 mph)
Transport dimension w x L x H	2250 mm x 1420 mm x 750 mm (88" 9/16 x 55" 7/8 x 28" 3/8)
Seeder	
Type of seed drill	Ventilated spline-slit seeder (SCV)
Seed rate adjustment	Potentiometer + proportional advance flow (DPA)
Seed drill capacity	80 liters (21 US gal)

KNIFE OVERSEEDING MACHINE

These overseeding machines allow you to perform your over-seeding operations in an economical way. The rotating knives create a groove in which the pods deposit the seeds. The machine allows a high precision seeding which is obtained by volumetric adjustment of all the cells constituting the rotor of the seed drill. The furrows are closed, naturally, by the elasticity of the grass but also by the passage of the roller with special tires. The cleaning of the tank is simplified thanks to the tool-free extraction of the agitator.

ROOGE 150.60 ROTADAIRON®

Clean cut by sharp discs

Ventilated spline-slit seeder

DISC OVERSEEDING MACHINE

This overseeding machine allows you to perform your over-seeding operations optimally. Each disc/injector unit produces a clean cut and precise deposit of seeds. This unique design allows us to offer you a compact machine with a limited weight allowing the selection of a tractor with less lifting capacity.

The cutting of the groove is carried out by sharp discs, arranged on independent blocks that follow the profile of the ground. The injectors place the seeds precisely in the furrows.

Precision seeding of classic mixtures, such as English ryegrass and fescues, is achieved with ventilated spline-slit seeders. The machine features two seed boxes, allowing different grasses to be sown on the front and rear discs

The rear roller then closes the grooves.

Technical details :

Machines	ROOG 150.60
Working width	1500 mm (59")
Total width	1760 mm (69" 1/4)
Weight	600 Kg (1433 lb)
Tractor : Required power	From 30 CV (Check the lifting capacity of the tractor)
Seeding depth	0 to 20 mm (0" to 3/4")
Interval between sowing	60 mm (2" 1/4)
Number of discs	24
Depth adjustment	3rd point + roller
3 point hitch	Categories 1 & 2
Transport dimension w x L x H (mm)	1760 mm x 1010 mm x 1490 mm (69" 1/4 x 58" 3/4 x 39" 3/4)
Seeder	
Type of seed drill	Ventilated spline-slit seeder (SCV) with DPA
Seed rate adjustment	Adjustment clock 0 to 12 o'clock
Seed rate calibration	From 2 to 30 g/m ²
Seed drill capacity	160 liters (42 US gal)

BRD 50 ROTADAIRON®

Floating field following system

Y-shaped mounting of knives on shackles

MULCHER FOR SKID-STEERS

This mulcher was designed to grind dense herbs and brambles. It achieves a very high performance thanks to the floating system (Rotadairon® Patent) which allows to follow perfectly and automatically the unevenness of the ground.

It is equipped with a device that complies with the regulations in force (EN12733) allowing the machine to be stopped quickly: as soon as the operator releases the controls and the machine ceases to be supplied with oil, our system brakes and stops the rotor in less than 7 seconds.

The Y-mounting of knives on shackles contributes to a better grinding.

Soil preparation principle

SOIL PREPARER / STONE BURIER TERRAGRO

The TERRAGRO developed by ROTADAIRON in collaboration with the professionals of the horticultural and market gardening sector is a preparator-burier for seedbeds or plantations, in beds or in forms. The TERRAGRO works the soil surface and respects its agronomic structure. Its oversized rotor with reverse rotation throws stones, plant waste and soil against the selection grid, and, by densimetry, deposits the coarse elements which are then covered with fine soil.

The beds have, in all points, a perfect homogeneity of density which favors a more grouped germination of seeds and a faster recovery of the plants.

The TERRAGRO can thus work in all types of soil (sand, clay, silt, pebbles) while ensuring an ideal quality of preparation.
